Verification

Sign Up for AWS

Security Verification

Root user sign in

Applying multifactor authentication to AWS account

Keep your account secure

Registering your MFA for root credentials will be required in 14 days.

Improve the security of your account by registering **multi-factor authentication (MFA)** using one of the options below. This provides a second means of verifying your identity in addition to your password. Learn more

MFA device name

Device Name

Maximum 128 characters. Use alphanumeric and '+ = , . @ - _' characters.

Passkey or Security key

Authenticate using your fingerprint, face, or screen lock. Create a passkey on this device or use another device, like a FIDO2 security key.

AWS recommends using a passkey or security key as an MFA device as they provide the most protection against attacks such as phishing.

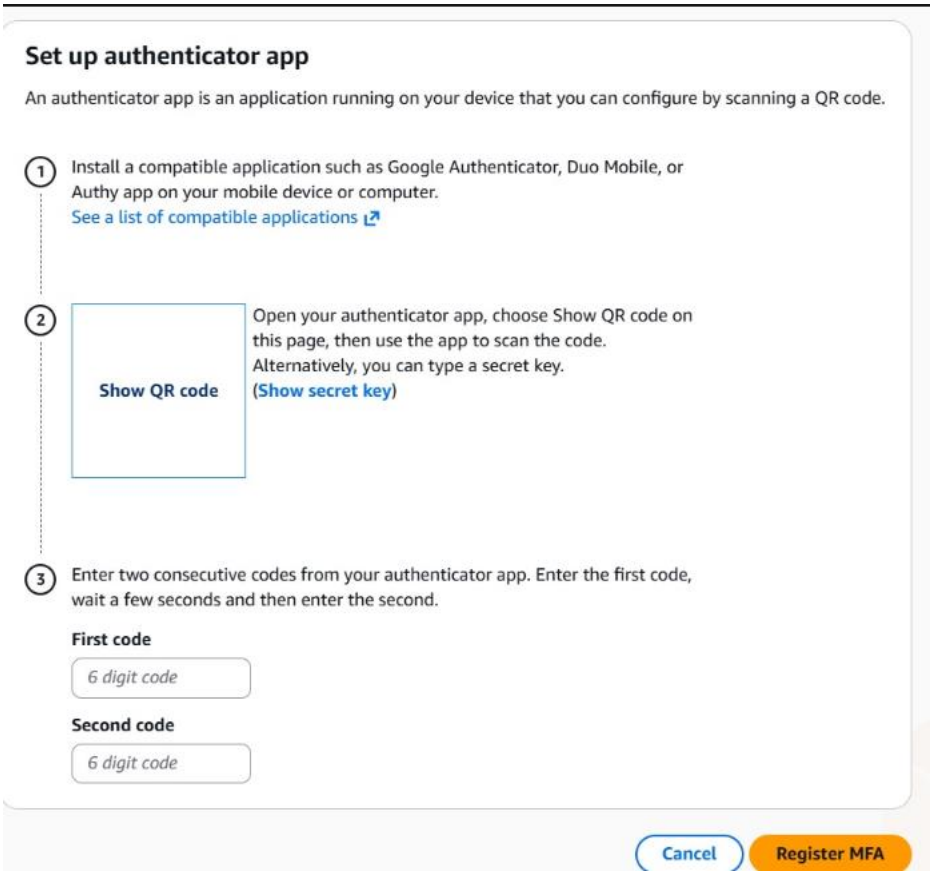

Authenticator app

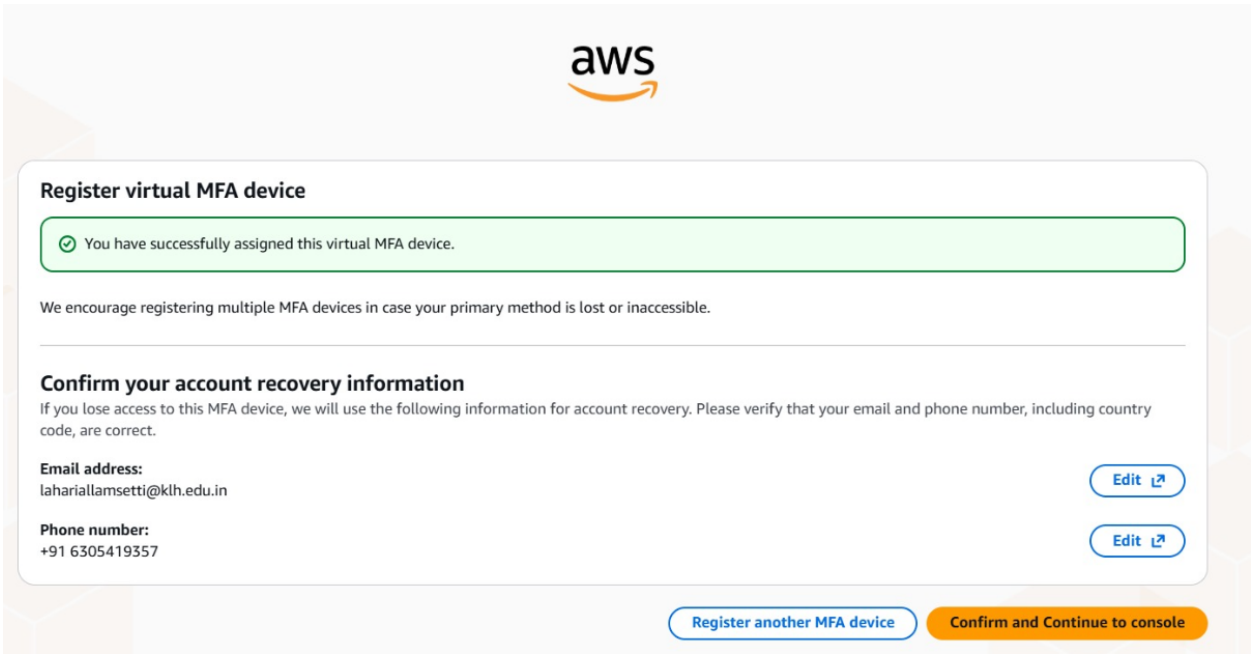

Authenticate using a code generated by an app installed on your mobile device or computer.

Hardware TOTP Token

Set up authentication app
